

| S.No | #   | Module name         | Video name                          | Description                                                                    | Duration (min) |
|------|-----|---------------------|-------------------------------------|--------------------------------------------------------------------------------|----------------|
| 1    | 1.1 | Working at heights  | Importance of safety harness        | Risk of not wearing a safety harness & key safety protocols                    | 5:03           |
| 2    | 1.2 |                     | House-keeping at height             | Risks of poor house-keeping at heights, & key safety protocols                 | 5:22           |
| 3    | 1.3 |                     | Working on a scaffolding            | Risks of working on a scaffolding & key safety protocols                       | 4:54           |
| 4    | 2.1 | Material handling   | Manual lifting                      | Risk of material handling during manual operations & key safety protocols      | 5:24           |
| 5    | 2.2 |                     | Forklift & BOPT operations          | Risk of improper forklift and BOPT operations & key safety protocols           | 6:10           |
| 6    | 2.3 |                     | Overhead crane operation            | Risks of improper overhead crane operations and key safety protocols           | 5:07           |
| 7    | 2.4 |                     | Mobile Crane safety                 | Risk of material handling during Mobile Crane safety & key safety protocols    | 4:11           |
| 8    | 3.1 | Electrical safety   | General electrical safety           | Risks while working with electricity and key safety protocols                  | 4:29           |
| 9    | 3.2 |                     | LOTO                                | Importance of Lock Out Tag Out                                                 | 5:20           |
| 10   | 3.3 |                     | Electrical LOTO Advanced            | Importance of Lock Out Tag Out & Key safety protocols                          | 5:00           |
| 11   | 4.1 | Machine safety      | General machine safety              | Risks associated with machine operations and key safety protocols              | 5:02           |
| 12   | 4.2 |                     | Grinding hand tool safety           | Risks of improper grinding and cutting hand tool use of & key safety protocols | 4:06           |
| 13   | 5.1 | Welding and cutting | Electric arc welding                | Risks of improper electric arc welding and key safety protocols                | 6:49           |
| 14   | 5.2 |                     | Gas cutting and welding             | Risks of improper gas cutting and welding and key safety protocols             | 5:25           |
| 15   | 6.1 | Fire safety         | General fire safety and prevention  | Key safety practices that can prevent fires                                    | 6:08           |
| 16   | 7.1 | General safety      | Good housekeeping                   | Key housekeeping processes that ensure a safe, organized workspace             | 4:28           |
| 17   | 7.3 |                     | Personal protective equipment (PPE) | Risk of not wearing a Personal protective equipment (PPE)                      | 7:19           |

|    |      |                   |                                      |                                                                                                        |      |
|----|------|-------------------|--------------------------------------|--------------------------------------------------------------------------------------------------------|------|
| 18 | 7.4  |                   | Life Saving Rules                    | Key Life Saving Rules that ensure a safe, organized workspace                                          | 8:15 |
| 19 | 7.5  |                   | First Aid Part 1                     | Risks of poor first-aid preparation and key steps to protect the injured                               | 8:38 |
| 20 | 7.6  |                   | First Aid Part 2                     | Critical first-aid responses to safely manage electrical injuries, burns, and heat-related emergencies | 8:52 |
| 21 | 8.1  | Excavation safety | Excavation safety                    | Key safety practices that must be followed during site excavations                                     | 4:13 |
| 22 | 9.1  | confined space    | Confined space safety                | Risks associated with working in Confined space and key safety protocols                               | 5:43 |
| 23 | 9.2  |                   | Vertical Entry Confined Space safety | Risks associated with working in Vertical Entry Confined space and key safety protocols                | 7:58 |
| 24 | 12.1 | Driving Safety    | General Driving Safety               | Risks associated with General Driving Safety and key safety protocols                                  | 8:00 |
